

## **In 6JB we...**

**Give guidance to people on what's right and what's wrong and being a great role model.**

**Do the right thing and make others follow.**

**Show respect by showing kindness to our peers and visitors, by not teasing and spreading rumours, about them or other people.**

**Show respect by not intruding on other peer's personal space. When someone else is talking, we listen and keep quiet.**

**Show empathy by helping our class mates and by being good role models to younger students.**

**Value each other's items and we ask for permission before taking.**

**Are confident and encourage others when working in groups. We cooperate and are respectful and remember that it is important that no one feels left out and everyone should have the chance to speak.**

**We communicate our ideas and thoughts by speaking with a clear and loud voice to our peers and teacher. When speaking in front of our classmates, we share our knowledge on a certain topic to improve their understanding of the subject. It is important to speak/share information to others so that they know what they can talk about.**

**We take pride in our work inside the classroom and we will put effort and detail in the work we do. We will keep persevering when we are doing any work and put as much effort as we can.**

**We behave and show respect to the teacher all the time. We follow the teacher's rules and we will be respectful in the yard to avoid arguments**

**We show confidence and speak with clarity. We also use appropriate language and tones while sharing our ideas. 6JB raise their hands if they want to share anything with class members.**

**We are kind to others, whether it is inside or outside the classroom.**

***"Treat others the way you want to be treated"***

**I \_\_\_\_\_, agree to the above terms which have been developed and discussed by Mr Basa and 6JB.**
